

Renata Avighi  
EXCELÊNCIA EM SORRISOS

# DR. RENATA AVIGHI

With 22 years of excellence in dentistry, **Dr. Renata Avighi**, graduated from the prestigious Unicamp-FOP, is a prominent name in restorative dentistry. Recognized for her natural talent and dedication, she built a career based on the search for the perfection of smiles and the recovery of patient's self-esteem.

Throughout her career, Dr. Renata specialized in oral aesthetics, completing more than 18 advanced courses with some of the greatest exponents of aesthetic dentistry in the world. This continuous investment in improvement has made it a reference in treatments that combine a lot of experience, technical precision, naturalness and exceptional durability.

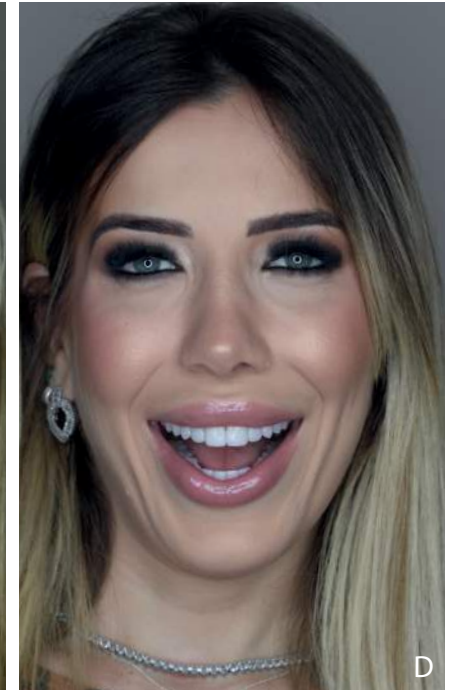

With a portfolio that includes more than 2.000 patients in Brazil and abroad, Dr. Renata is synonymous with excellence in procedures such as resin restorations, dental contact lenses, prostodontics, whitening and gum plastic surgery, always with an impeccable finish and results that achieve due to their sophistication and longevity.

At the head of her boutique clinic, a space that reflects her care for patients and passion for high-standard dentistry, Dr. Renata Avighi transforms smiles in Piracicaba and São Paulo, combining cutting-edge technology, artistic mastery and a meticulous eye to highlight the beauty of each patient.

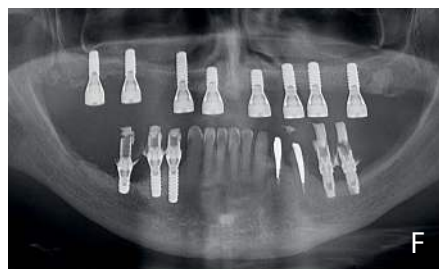

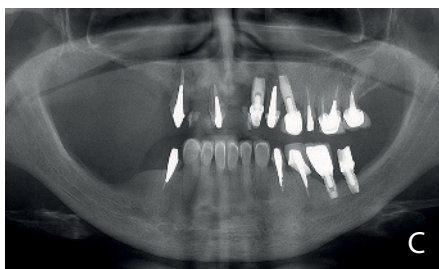

# OUR CASES OF SUCCESS

## JAQUE BALTIERI

Jaque arrived at the clinic dissatisfied with old and poorly adapted resins, which compromised the aesthetics of her smile and caused constant breakage (Photos A, B, C). The resins were replaced with 22 modern, highly durable dental contact lenses, made with state-of-the-art materials and excellent adaptation, returning the correct occlusion guides (Photos D, E, F). In just 30 days, we gave Jaque back a harmonious and natural smile, freedom to smile and eat with confidence, self-esteem and quality of life.

## WALMIRA

After more than 10 years looking for solutions in different offices, Walmira arrived at Clínica Renata Avighi on the recommendation of another dentist. During this long journey, she lost some teeth, as well as her self-esteem and confidence in eating (Photos A, B , C). The treatment was a complete transformation: bone graft to enable the installation of implants (Photo E) and subsequent upper protocol, followed by porcelain on teeth and implants in the lower arch (Photos E and F) In one year of treatment, Walmira regained the joy of smiling, the tranquility when eating and the confidence in herself.

## FERNANDA BERTO

Fernanda faced stained teeth and signs of dental erosion (Photos A and B). The initial appointment was essential to identify a stomach illness. The treatment, completed in just 15 days, was complete oral rehabilitation with 24 high-tech and durable dental contact lenses, restoring lost enamel structure, in addition to increasing the Vertical Dimension of Occlusion (Photo D). After the smile transformation, the patient lost 30 kilos, highlighting the positive impact of aesthetic dentistry associated with the correct referral to specialist doctors to provide patients with complete health (Photo C).

## LUCAS BATISTA

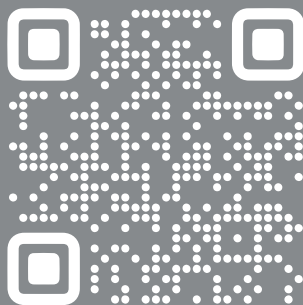

Lucas came to the clinic dissatisfied with the large spaces between his teeth and embarrassment when smiling (Photos A and B). The treatment carried out was the use of a modern orthodontic aligner to re-proportion the spaces (Photo C), tooth whitening and six aesthetic resins to close the spaces (Photo D). In just six months, Lucas achieved an aligned, harmonious smile and the confidence to smile and communicate (Photo E).

## NETO BIONDO

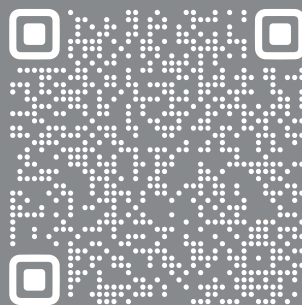

Neto arrived at the clinic dissatisfied with crooked and yellowed teeth (Photos A and B), but he did not want to resort to using fixed orthodontic braces. The solution was a personalized treatment with aligners, teeth whitening and six resins in the upper teeth and four resins in the lower teeth. In just three months, Neto achieved a smile that combines aesthetics, function and well-being, restoring his confidence and increasing his self-esteem (Photos C and D).
