

Renata Avighi
EXCELÊNCIA EM SORRISOS

DR. RENATA AVIGHI

With 22 years of excellence in dentistry, **Dr. Renata Avighi**, graduated from the prestigious Unicamp-FOP, is a prominent name in restorative dentistry. Recognized for her natural talent and dedication, she built a career based on the search for the perfection of smiles and the recovery of patient's self-esteem.

Throughout her career, Dr. Renata specialized in oral aesthetics, completing more than 18 advanced courses with some of the greatest exponents of aesthetic dentistry in the world. This continuous investment in improvement has made it a reference in treatments that combine a lot of experience, technical precision, naturalness and exceptional durability.

With a portfolio that includes more than 2.000 patients in Brazil and abroad, Dr. Renata is synonymous with excellence in procedures such as resin restorations, dental contact lenses, prostodontics, whitening and gum plastic surgery, always with an impeccable finish and results that achieve due to their sophistication and longevity.

At the head of her boutique clinic, a space that reflects her care for patients and passion for high-standard dentistry, Dr. Renata Avighi transforms smiles in Piracicaba and São Paulo, combining cutting-edge technology, artistic mastery and a meticulous eye to highlight the beauty of each patient.

SOCIAL AND ENVIRONMENTAL ACTIONS

At **Clínica Renata Avighi**, dental excellence and commitment to well-being go beyond the office. Three initiatives stand out for combining care and social responsibility: the **welcome gift**, which reflects sustainability and gratitude; the **Smile Project**, which transforms lives through free dentistry for vulnerable young people; and the **exclusive home spray**, whose olfactory identity combines elegance and purpose, with 100% of profits going to social causes. Every detail carries a commitment to caring not only for smiles, but also for people and the planet.

Check it out more below!

SMILE PROJECT

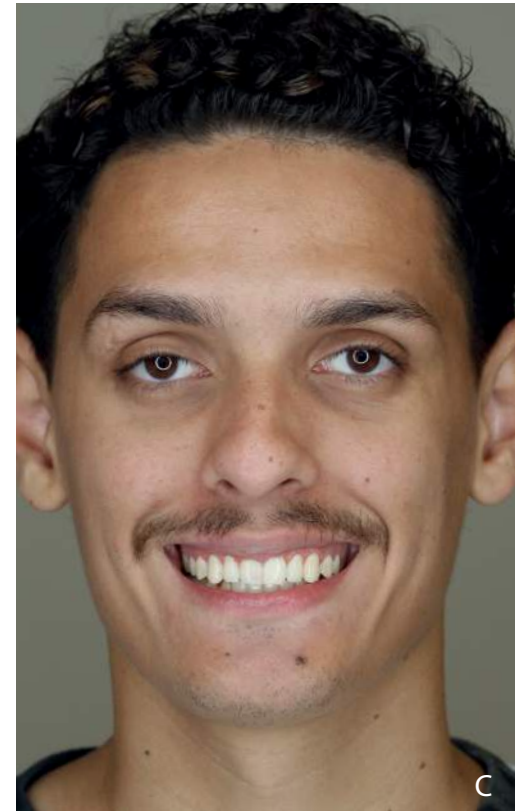

The Renata Avighi Clinic is the birthplace of a transformative initiative: the Smile Project. Through it, young people in vulnerable situations, referred by care and professional training institutions, receive free dental care, with a focus on oral health and dental aesthetics.

The project, which has been changing lives for three years, offers procedures such as aesthetic resin restorations and teeth whitening, with the aim of restoring self-esteem and opening doors to the future. Young people aged 14 to 26, without prior access to these treatments, have their smiles restored and, consequently, gain confidence to face the job market and life's challenges.

With complete independence from government organizations, The Smile Project reflects the commitment of Dr. Renata Avighi and her team to promoting not only more beautiful smiles, but also opportunities for personal and professional transformation, reinforcing that a confident smile can change stories.

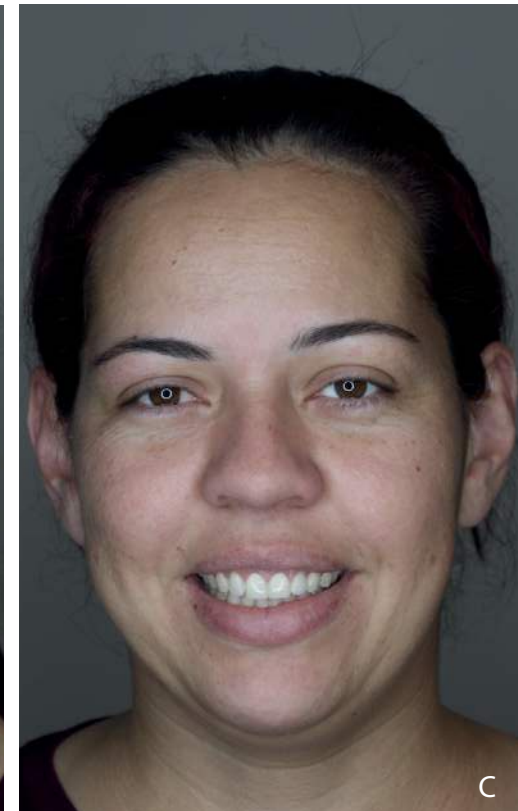

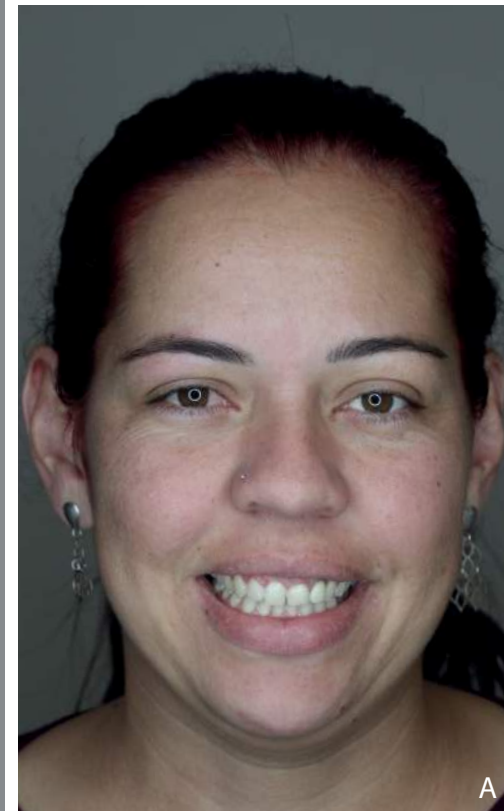

GUILHERME

Guilherme's smile (Photos A and B) and self-esteem were transformed with a complete treatment that included gum lift, teeth whitening and the application of six previous aesthetic resins. The result? Teeth aligned, revitalized and with a natural, translucent appearance, as well as an impeccable shine that highlights the health and beauty of the smile (Photos C and D).

FLÁVIA

Flávia faced the discomfort of old, darkened porcelain, with a metal base and inadequate adaptation, which compromised her smile (Photos A and B). To restore his confidence, gum surgery was performed, the old porcelain was exchanged for a modern one, metal-free version and two aesthetic restorations were performed on the anterior teeth. The result was an aligned, natural smile with a shape that enhances facial harmony (Photos C and D).

NADHIELLY

Nadhielly avoided smiling due to an old, stained restoration on one of her front teeth, which created an aged appearance and compromised her aesthetics (Photos A and B). The treatment included replacing the restoration with a new, more harmonious and discreet one, as well as refined polishing for a perfect finish (Photos C and D). Due to his young age, the diastema between the front teeth was maintained, preserving the naturalness, youthfulness and balance of the smile.

WELCOME GIFT

At Clínica Renata Avighi, each careful smile also represents a commitment to the planet and a more sustainable future.

When starting treatment, each patient receives a specially chosen gift: a The Humble Co. toothbrush, made with 100% biodegradable bamboo and bristles from the renowned DuPont, the brushes combine efficiency in oral care with a positive impact on the environment. In addition, part of the resources goes to The Humble Smile Foundation, which supports projects aimed at children in vulnerable situations around the world.

HOME SPRAY WITH ITS OWN OLFACTORY IDENTITY AND SOCIAL COUNTERPART

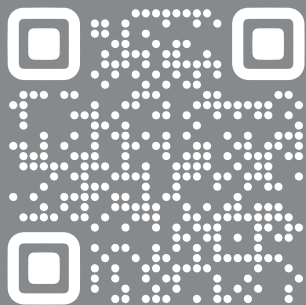

Sophistication is present in every detail of Clínica Renata Avighi, including its exclusive olfactory identity, translated into the renowned home spray. More than a simple aroma, it provides a sensorial experience that combines elegance, freshness and social purpose, as 100% of the profit from sales goes to the charity Casa do Amor Fraterno, in Piracicaba.

The perfume of the home spray was carefully developed with a harmonious blend that combines delicate floral notes, refreshing herbal touches and a softly fruity background. The composition brings together the lightness of bamboo, the sophistication of lily, the citrus freshness of bergamot and the enveloping softness of cherry blossom.

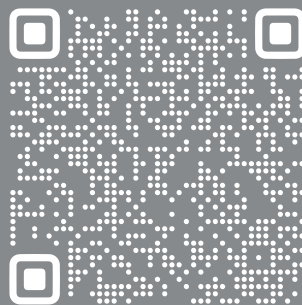

The result is an aroma that transforms environments, bringing tranquility, refinement and well-being. The home spray from Clínica Renata Avighi is much more than a differentiator: it is a unique signature that combines sophistication, care and social responsibility in a single bottle.
